Statement

Mr. Lester Snow
Executive Director
CalFed Bay/Delta Program
1416 Ninth Street
Suite 1155
Sacramento, CA 95814

Dear Executive Director Snow:

I am writing to urge you to revise the CALFED Bay/Delta program to maximize conservation and habitat restoration. Please consider increasing investments in water conservation, water use efficiency, and groundwater management. Emphasis should be placed on conserving water used by agriculture and the general populace rather than raising dams, building additional dams, or creating offstream storage reservoirs which would inundate existing wildlife habitat areas. In addition, the program should absolutely enforce pollution limits as a basic step to improving water quality. Please strengthen and continue CALFED's already existing efforts to restore fish and wildlife habitat in the Central Valley.

Thank you for your consideration.

Sincerely,

Jennifer Davidson
